

SIMPLIFY HEALTHCARE INTEGRATION

Corolar provides a scalable, reliable, and secure HL7 platform with end-to-end functionality for designing, developing, and managing today's complex HL7 integration projects. Supporting all HL7 v2x and v3 standards, Corolar can be easily customized to support vendor-specific HL7 implementation. Based on Microsoft BizTalk Server and industry-standard Microsoft technologies, Corolar helps your organization to simplify HL7 interfaces, accelerate development, and manage the integration environment.

SIMPLIFY. HL7 integration made easy.

HL7 Integration is complicated — but Corolar is simple. Corolar provides the end-to-end design, development, and management components you need to ensure successful delivery of HL7 integration solutions. Our industry-leading Specification Builder enables integration analysts and interface developers to automatically generate, standardize, and manage HL7 interface documents across your organization.

ACCELERATE. HL7 interfaces implemented faster.

Corolar embraces and extends the power of Microsoft BizTalk Server with comprehensive tools for simplifying and accelerating HL7 solution delivery. Jump-start your implementation process with Dapasoft's unique Visual Studio extensions. Ensure that your projects are based upon proven best practices with our HL7 v2.x and v3 solution frameworks. With Corolar, your next project will benefit from faster implementation, scalable solutions, less cost, and greater efficiency than other industry solutions.

MANAGE. HL7 peace of mind.

Corolar includes robust management tools for keeping a close watch over your HL7 environment—so that you don't need to. Corolar field-proven management tools offer key features including automated alerting, flexible interface monitoring, message resubmission, and more.

Award Winning Solution
2008 & 2009

STREAM LINE PROCESSES. IMPROVE EFFICIENCY. REDUCE COSTS.

Corolar solves the problem of integrating systems in a multi-vendor environment by delivering a scalable integration strategy. Corolar will accelerate your delivery time-frame by boosting infrastructure capabilities, and creating measurable organizational efficiencies. Built to leverage Microsoft BizTalk Server, Corolar's proven and easy-to-use solution frameworks can reduce development time by months, streamline complex integrations, and reduce costs unlike any other industry solution today.

The image displays three overlapping screenshots of the Corolar software suite. The top-left screenshot shows the 'COROLAR INTERFACE DESIGNER' web application with a sidebar menu and a main content area. The top-right screenshot shows a Microsoft Visual Studio window displaying a BizTalk orchestration diagram for 'HIS_ADT_ADT_TO_Lab_Order_ADT.btm'. The bottom screenshot shows the 'COROLAR INTERFACE MONITOR' web application, which includes a navigation menu and a table of interface status.

Interface Name	Interface Address	Port Status	Last Activity	Queue Size	Health Status
